1888 Press Release - Taylor, Ricci & Associates has announced today that they are doing their part to reduce the human footprint on this Earth.

Effective immediately, TRA will implement a green environment at all of their branch as well as corporate offices. This green environment consists of creating a document control flow that will allow more business transactions to be completed virtually, thus eliminating thousands and thousands of documents that are printed.

Internal company documents will also be virtual and accessed through the company's private network, such as employee notices, employee handbooks, Requests for Time Off (RTO), etc.

Taylor, Ricci is proud that they can be a small piece in the world puzzle of helping to contribute to a health Earth and challenges businesses everywhere to do their part.
